

Kumbh Research & AI Internship Program

Who is this for

Students, working professionals and tech enthusiasts who want to work on a real-world and large-scale problem.

If you're curious about data, AI, or how massive events like the Kumbh Mela function then this is for you.

Perks

- Certificate of completion
- Opportunity to contribute to work linked with one of the largest human gatherings
- Recognition on our official LinkedIn page (top contributors)

What you will work on

You will help build a structured dataset and an AI-ready foundation around Kumbh Mela.

Step 1: News Collection

- Collect news articles related to Kumbh Mela
- Coverage period:
 - Nashik Kumbh Mela 2015 (± 1 year)
 - Prayagraj Kumbh Mela 2025 (± 1 year)
- Sources:
 - National newspapers
 - Regional/local newspapers

Step 2: Topic Extraction

- Break each news article into a clear, focused topic
(Example: crowd management, sanitation, transport, health, lost & found, etc.)

Step 3: Timeline Mapping

- Map each topic to:
 - Date of the news
 - Phase of Kumbh (before / during / after)

Step 4: AI Model (Basic Level)

- Use the dataset you created to:
 - Cluster similar topics
 - Identify patterns over time

- (Optional advanced) Build a simple classification or prediction model

(You don't need to be an expert. Clarity of data matters more than complexity of AI.)

Expected Output

Each participant/team should deliver:

1. Structured News Dataset
 - Source
 - Date
 - Headline
 - Extracted topic
2. Topic-wise Insights
 - Grouped themes (e.g., crowd, health, logistics)
3. Timeline Mapping
 - Topic vs time (before, during, after Kumbh)
4. Basic AI Output
 - Pattern, clustering, or simple model (even visual insights work)

Expected Outcome

- Clean, well-organized data
- Clear topic classification (not vague categories)
- Logical timeline mapping
- Practical insights (not just theory)
